BRINGING A WORLD OF INFORMATION TO YOUR LOCAL LIBRARY

Tardigrades (also called water bears or moss piglets) are among the most resilient animals known to humankind. You can boil them, freeze them, crush them, deprive them of oxygen, or even blast them into space. It doesn't matter—tardigrades can survive practically anything. These eight-legged aquatic animals may be microscopic, but they can certainly make the best of a tough situation. Your friends at Winding Rivers Library System congratulate you on *your* resiliency over the past couple of years and hope you learn something new and infinitely awesome at WAPL in 2022!
